

WATERTM SOURCE

SWIMMING POOL AND SPA HEAT PUMPS

Water Source Heat Pumps bring the warmth of the tropics or the cool of the mountains to your large backyard or community swimming pool and spa. By using the warm water from nearby wells, lakes, canals, or oceans, the Water Source "borrows it's heat" from these natural water sources and transfers it to your swimming pool. It's safe, efficient, and gentle on the environment.

thermo_{air} TITANIUM HEAT EXCHANGER

- Patented counter-flow water management system
- Heats water faster and more efficiently
- Impervious to chemical corrosion
- Durability without sacrificing performance
- Available on most models
- Lifetime limited warranty

INTEGRATED COMPRESSOR

- State of the art technology
 - Highest efficiency
 - Quietest operation
 - Unsurpassed reliability
 - Superior durability
-
- Marine-grade aluminum cabinet
 - Electronic control and monitoring system
 - Heat & cool options available on all models
 - Dual pool & spa thermostats standard on all models
